

Concerned about your preschooler?

As children grow, they reach developmental milestones as they learn to speak, play, act, move and socialize with others. But every child is unique — meaning they grow and develop at different rates! Sometimes, children require additional support while they are busy learning the skills they will need to enter kindergarten.

If you think your child might need more support, Build Up Michigan can help! We offer **FREE EDUCATIONAL SUPPORT** for children ages 3 through 5, so that they can be prepared with the skills they need for kindergarten.
